

FAHAD ZAKIR

FULL STACK WEB DEVELOPER

DEAR HIRING MANAGER,

I am very excited to apply for this position. An example of how passionate I am about programming is travelling from Orlando, FL to Atlanta, GA in order to attend a full-stack immersive course with General Assembly. I learned the latest technologies there which I put into practice by building apps. I am confident that my zeal and drive to keep learning will allow me to succeed.

When it comes to front-end, I possess a great eye for design while writing clean codes. I have experience building projects with HTML, CSS, Javascript, and React.js. For back-end technologies, the foundations for me started with Node.js + Express + mongoDB and Rails. I have built projects using these as back-end while using React.js for front-end deployment.

I strongly believe that I can be a great addition to your company where I will work my tail off giving it everything I got. I would love the opportunity to discuss this opportunity with you further. If you have any questions about my background, please do not hesitate to reach out to me at fahadzakir11@gmail.com or 407-446-9070. I look forward to hearing from you!.

Sincerely,

Fahad Zakir
Candidate
