

FAHAD ZAKIR

FULL STACK WEB DEVELOPER

DEAR KIMBERLY,

I'm excited to apply for this opportunity. I want to start off by letting you know about myself and how determined I am. An example of how passionate I am about programming is travelling from Orlando, FL to Atlanta, GA in order to attend a full-stack immersive course with General Assembly. I learned the latest technologies there which I put into practice by building apps. I am confident that my zeal and drive to keep learning will allow me to succeed.

As far as my skillset for front-end, I possess a great eye for design while writing clean codes. I have experience building projects with HTML, CSS, Javascript, and React.js. For back-end, the foundations for me started with Node.js + Express + mongoDB and Rails. I have built projects using these as back-end while using React.js for front-end deployment. Rails with PostgreSQL is what we used for SQL database and I combined that with React.js for a React on Rails app.

I strongly believe that I will be a perfect fit due to my creativity. If given this opportunity I will give it everything I got. I would love the opportunity to discuss this opportunity with you further. If you have any questions about my background, please do not hesitate to reach out to me at fahadzakir11@gmail.com or 407-446-9070. I look forward to hearing from you!

Sincerely,

Fahad Zakir
Candidate
